Mountain Weather Forecast

Brecon Beacons National Park

Forecast valid from 00:00 on Tuesday 16 Feb 2021 until 23:59 on Wednesday 17 Feb 2021

Forecast Issued on Monday 15 Feb 2021 at 16:24

Confidence: High confidence for an unsettled week of periods of rain and strong winds, mostly from the south or southwest giving milder conditions aiding the continued thaw of any snow from lower levels. Lower confidence for timings and amounts of rainfall.

Headline for Tuesday 16 Feb 2021: Quite cloudy at times and some showers possible in the afternoon, strong winds.

Precipitation probability							
70%	70%	80%	40%	40%	40%	40%	40%

Forecast for Tuesday 16 Feb 2021

Weather: A band of rain will cross the area in the early hours giving a few hours of heavy rain, this combined with any snowmelt may give some local flooding. The rain pushes east by dawn but it will remain quite dull and cloudy for a time before some clearer spells later in the day. In the afternoon there is a risk of a few showers around the hills but many places may miss these altogether.

Chance of cloud free mountain/hill tops above 600m: 30% lots of low cloud associated with the rain shrouding the tops at times but a few breaks developing especially in the afternoon so increasing to 70%.

Visibility: Low cloud overnight associated with the rain will be broken around 400m and above, during the morning some breaks will develop and the base will lift to around 600m however there will be patches of lower cloud for much of the day. Visibility will deteriorate to moderate or poor in showers and cloud will thicken and lower in showers again. More chance of clearance around the more easterly hills in the afternoon.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Freezing level falling during the day but any remaining snow thawing helped along by the overnight rain. Still feeling cool in the strong winds, these easing later in the day.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
15:00 on Mon 15 Feb 2021	13.8mm	20.4mm	20.4mm

Forecast for Wednesday 17 Feb 2021

Weather: A period of rain overnight will clear to leave a brighter day with showers but also some bright or sunny spells. Further rain is expected in the afternoon and evening.

Maximum wind: Southerly 20-25mph with gusts 35-40mph.

Chance of cloud free mountain/hill tops above 600m: 40% in the morning, increasing to 70% as rain clears but may reduce to 30% as further rain spread in.

Visibility: Cloud bases likely to be around 400m in the morning as rain clears but cloud will lift and break leaving good or excellent visibility out with showers. In any showers visibility is likely to become moderate or poor for a time and cloud is likely to lower over the tops to 600m again, possibly lowering to 300m in the evening.

Temperature: **Valleys:** Plus 5 rising to 9 Celsius.
At 600m: Plus 3-4 Celsius
Freezing level: 1000m
